Forecast for Monday 23 May 2022

Weather: The early hours of Monday will be mainly dry, though with a risk of some low cloud and associated hill fog and drizzle while it is still dark. Once the sun comes up, the morning will be dry and bright with sunny spells. Showers are possible from 11 am, and these will become frequent and heavy in the afternoon, with a low risk of thunder and lightning. Rainfall rates of 10mm/ hour could mean some brief flash flooding in brooks and on roads. The risk of heavy showers will continue into the evening, with thunder still possible up to and beyond midnight.

Chance of cloud-free hill tops above 600m: From midnight to 6 am. 60% with cloud down to 300m.
From 6 am to 11 am: 90% with cloud expected to be above the summits.
From 11 am to midnight: 60%, with some shower clouds covering the summits.

Low cloud and visibility: From midnight to 6 am: Low cloud covering hills with fog down to around 300m.
6am to 11am: cloud expected to be above the summits. 11am to midnight: Cloud mainly above summits but in showers, the summits may be briefly covered with cloud, and in heavy showers visibility at low levels may drop to 2000m at times.

14:00 on Sat 21 May 2022	0mm	1.2mm	7.2mm

Forecast for Tuesday 24 May 2022

Weather: A few showers are likely in the early hours of Tuesday and during Tuesday morning, though these will be less heavy and less frequent than on Monday, with no risk of thunder. The showers are expected to clear by midday to leave a bright dry afternoon, with sunny spells. It will become quite breezy though. In the late evening (after dark) winds will increase and rain will arrive.

Maximum wind: Gusts of 35 mph on the summits in the evening.

Chance of cloud-free hill tops above 600m: Midnight to 7am 40% with some low cloud covering the hill tops.
7am to 10 pm 90% with a small risk of shower clouds obscuring hill tops for short periods.
10pm to midnight 30%, with thick low cloud covering hills down to 200m.

Low cloud and visibility: From midnight to 7am: Low cloud covering hills down to around 300m above sea level. Above this height, visibility of 100m or less is likely.
7am 10 pm: Cloud mainly above summits but in showers, the summits may be briefly covered with cloud, and in heavy showers visibility may drop to 2000m at times.
10 pm to midnight. Thick cloud covering hills down to 200m. Visibility above 200m height could be as low as 50m.

Temperature: **Valleys:** 7C at dawn rising to 15C in the afternoon.
At 600m: 4 C at dawn, rising to 7C in the afternoon.
Freezing level: Well above summits
